

SMARTER MANAGER CAPABILITIES

SME Software has been publishing award-winning software for the manufacturing industry since 1987. With hundreds of customers in virtually every facet of manufacturing and production, we've established ourselves as a premier supplier of enterprise software. We truly understand manufacturing, whether it is for a job shop, make to order, engineer to order, assemble to order, mixed mode, or repetitive environment.

SMARTer Manager combines our manufacturing expertise with leading-edge technology to deliver a product with unparalleled capability, stability, performance, flexibility and security. We address the unique needs of the small to midsize manufacturer with a full suite of Client/Server modules designed for Windows.

We invite you to explore the capabilities of SMARTer Manager and encourage you to ask how these capabilities can be combined to meet your specific goals.

- * Sales Orders
- * Sales Force Automation
- * Estimating
- * Production Orders
- * Blanket Orders
- * Time & Material Orders
- * Product Configurator
- * BOM – Bill of Materials
- * CAD to BOM Link
- * Engineering Change History
- * Inventory Control
- * MRP – Materials Resource Planning
- * Material Backflushing
- * Work In Process
- * Lot Number Control
- * Serial Number Control
- * Web User Interface
- * EDI Integration
- * SPC Integration
- * Forecasting Integration
- * Document Management
- * Object Management
- * CAD Drawing "Redlining"
- * Physical Inventory Counting
- * Job Shipment Splitting
- * Finite Scheduling (Forward and Backward)
- * Infinite Scheduling (forward and Backward)
- * Automatic Substitution of Resources
- * Automatic Load Leveling
- * Priority Scheduling by Customer/Job/Shipment
- * Master Schedule Gantt chart
- * Resource Schedule Gantt Chart
- * "What If" Scheduling
- * Lead and Lag Queue Times Per Operation
- * Real Time Bar Code Data Collection
- * RMA – Return Material Authorization
- * EIS – Executive Information System
- * Event Alerters
- * Screen Designer
- * Drill Down Abilities
- * Accounts Payable/Receivable
- * General Ledger
- * Financial Explorer
- * Payroll
- * Activity Based Job Costing
- * Purchasing
- * RFQ's
- * Internet/Intranet Technology
- * Charts and Graphs
- * ...and more!

THIN CLIENT & CAPABILITIES

Thin Client

AN AFFORDABLE SOLUTION TO YOUR CRITICAL COMPUTING NEEDS

Today's enterprises are growing at a rapid rate, and in many different directions. Employees are spread around the nation in different operations, or working from homes, hotels, customer locations, and many other places. SMARTer Manager has provided the **affordable solution** for your critical computing needs across the world, and across the internet.

SMARTer Manager's intelligent technology is combined

with Citrix MetaFrame, thin-client/server system software for Microsoft Windows Terminal Server. Now you can extend SMARTer Manager across the entire enterprise by extending access to any device, at any location, through any connection. This robust technology offers enterprises a cost-effective way to deploy, manage and support applications from a single point.

THIN-CLIENT

The power of single-point control for deploying, managing and supporting applications, including enterprise-wide rollouts, updates and additions.

HOW IT WORKS

MetaFrame connects SMARTer Manager users to the network through standard telephone lines, WAN links, broadband connections, wireless and CDPD connections, as well as the internet or corporate intranets. Companies will find MetaFrame especially suited for extending business applications to users at remote locations because the Citrix Independent Computing Architecture (ICA) protocol is optimized for low bandwidth connections. That's why ICA has become a *de facto* industry standard for delivering corporate applications across the broadest variety of desktop platforms and networks.

On the server, ICA has the unique ability to separate the SMARTer Manager program logic from the user interface. On the client, users see and work with SMARTer Manager's interface, but 100% of the application executes on the server. And with ICA, SMARTer Manager will consume as little as one-tenth of its normal network bandwidth.

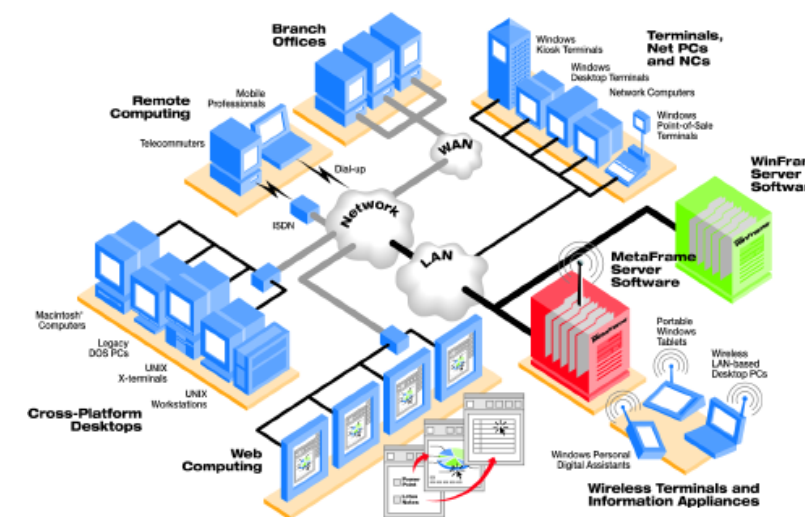

affordable solutions to critical needs...

...that's SMARTer Manager!

INSTANT ACCESS

You can instantly provide access to SMARTer Manager across virtually any type of network connection to any type of client. You get the power of single-point control for deploying, managing, and supporting applications, including enterprise-wide rollouts, updates, and additions. Users get the universal access to SMARTer Manager, exceptional performance they require, and the ease of use they are accustomed to. Plus, it's cost-effective and secure.

SME Software is committed to the Microsoft Terminal Server and Citrix MetaFrame technology. SMARTer Manager was also one of the first five products in the world to pass the VeriTest MTS Compliance tests, and we're also an official Citrix Business Alliance Member.

As the size of your enterprise grows, SMARTer Manager grows with you!

SMARTer Manager Will Grow With You...

...and Help You Grow!

SMARTer CAPABILITIES

We combine leading-edge technology with unparalleled capability, stability, performance, flexibility and security. That's SMARTer!
